Distribution of the red-eyed tree frog

[Synonyms](#)

- *Hyla chloris* Boulenger, 1892
- *Litoria chloris* – Tyler, 1971
- *Dryomantis chloris* – Wells and Wellington, 1985
- *Dryopsophus chloris* – Duellman, Marion, and Hedges, 2016

Ranoidea chloris, commonly known as the **red-eyed tree frog** or **orange-eyed tree frog**, is a [frog](#) from eastern [Australia](#). It lives in forests, wetlands and sometimes cities. ^{[1][2][3]}

Adult frogs look for food at night and spend most of their time in trees. ^[1]

They lay their eggs in permanent or temporary bodies of water, so the tadpoles must grow into frogs quickly or they will die when their homes dry up.^[2] The tadpoles start out yellow but become green as they grow. Red-eyed tree frog tadpoles can jump out of the water to catch flying insects.^[1]
