

Mount Batur

Mount Batur from [Kintamani](#)

Mount Batur, or what remains of it, is to the right of center; Mount Agung is at the left; on the far right is [Mount Bratan](#). This view is looking to the south west.

Mount Batur ([Balinese](#): , romanized: *Gunung Batur*) is a [volcano](#) on [Bali](#). Mount Batur last [erupted](#) in [2000](#). It is a volcano inside an older, larger, volcano. The original eruption, about 30,000 years ago, is one of the largest known volcanic events on Earth. The volcano is now 1,717 [metres](#) (5,633 [feet](#)) high. There are many people — whole villages — living inside the [caldera](#).

This [short article](#) about [Asia](#) can be made longer. You can help Wikipedia by [adding to it](#).
